2022 Alabama Wage And Salary Survey

City

<u>ACKNOWLEDGEMENT</u>

BACKGROUND

There is a continuing need for reliable and current wage and salary information that provides the granularity necessary to support ongoing work of local cities and counties in the state.

In 2021, the Association of County Commissioners of Alabama (ACCA), the Alabama League of Municipalities (ALM), and the Alabama Association of Public Personnel Administrators (AAPPA) partnered with the Government and Economic Development Institute (GEDI) at Auburn University, in a collaborative effort. The purpose of the partnership was to conduct a wage and salary survey and study, resulting in a report to provide organizations, both city and county, with updated and useful wage and salary information.

Participation by partner member organizations was solicited. Member organizations submitted their data to GEDI for processing and integration into master data files for cities and counties. The window for participation in this year's survey went from January 1, 2022, to June 19, 2022.

PARTICIPATION SOLICITATION

Initial letters from the partnering organizations were sent by email to the partner organization membership in the first weeks of the project requesting maximum participation in the wage and salary survey. Follow-on requests for participation were throughout the window for participation.

OPTIONS FOR PARTICPATION

Considering social distancing and other work limitations due to the COVID-19 pandemic, organizations were asked to use one of the following options to submit their survey responses. These options are listed in order of preference for ease of participation.

Option1.
Provide GEDI with an electronic copy of your current classification plan and pay plan with the number of employees in each job (no employee names, please). GEDI will extract the information from these documents.

Option 2.
Provide GEDI with an internet address where your current classification and pay plan can be accessed and extract the required information.

Option 3.
Provide GEDI with a link to your organizations HR information system (i.e. NEOGOV) where GEDI team members can research, and extract required information.

Option 4.
GEDI provides access to an electronic survey for your organization to complete and transmit the survey information to GEDI.

Option 5.
GEDI mails a hardcopy of the survey for participants to complete and return (GEDI will support this option by direct request from participants and will include a postage paid envelope for return).

2022 PARTICIPATION RESPONSE

City Report

Over thirty-nine (39) cities participated in the 2022 survey; this represents 28% increase from the survey conducted in 2020.

Wage and Salary information was gathered predominately through three of the options - GEDI receiving electronic copies of classification and pay plans, using the GEDI designed survey questionnaire, and data pulled from third-party sources.

The GEDI survey, as reflected in this report, asks for weekly and annual hours worked, as well as hourly wages and annual salaries. Where this information was absent, a standard assumption of a 40-hour workweek/2080-hours worked annually was applied. This assumption also applies to jobs that typically have a varied number of hours such as public safety jobs (Fire and Police) unless the different hours were provided in the data received by participating organizations. Please take this into consideration when comparing your locality to others.

DATA PRESENTATION

The data in the report is presented by Job Title. Job titles were reviewed and consolidated where the job functions were similar. City data was also shown by city populations using the following population categories:

- 300,000 or more   (A)
- 175,000 to 299,999   (B)
- 100,000 to 174,999   (C)
- 50,000 to 99,999   (D)
- 25,000 to 49,999   (E)
- 12,000 to 24,999   (F)
- 6,000 to 11,999   (G)
- Less than 5,999   (H)

This population breakout is consistent with the Alabama Code Classification of Municipalities (Section 11-40-12).

GEDI used a common set of job titles to make comparisons between municipalities easier. There is no guarantee that the job titles presented in this report are an all-inclusive list of occupational job titles in every organization. We look forward to and appreciate your feedback as this can only make future surveys more accurate.
