## A Dose of Safety: How to Properly Dispose of Medications

By: Kyle Hines, Loss Control Representative, AMIC/MWCF

Medications serve as powerful tools in managing illnesses, alleviating symptoms and promoting overall health and well-being. As essential as medications are in our health, unused prescription medications are a public safety hazard, which may lead to accidental poisoning, misuse or overdose. Properly disposing of medications is a crucial step in safeguarding the health and safety of the public. Here are some tips.

**Securely Store Your Medications:** Store all medications, including prescription and over-the-counter drugs out of reach and sight of children. Consider using child-resistant containers or locking cabinets to prevent unauthorized access.

*A helpful tip: Storing medications in the bathroom or bathroom cabinet may damage your medications. The heat and moisture from your showers, baths or sinks may affect the potency of your medications.*

*Instead... try storing your medications in a cool, dry place away from heat, moisture or direct sunlight. Certain medications include specific storage instructions to maintain their effectiveness. Check the prescription bottle or ask your pharmacist if you are unsure.*

**Regularly Inventory Your Medications:** Periodically check your medication cabinets for unused or expired medications. Disposal of these medications promptly may reduce the risk of accidental ingestion.

**Use Drug Take-Back Programs:** The U.S. Drug Enforcement Administration (DEA) hosts a National Prescription Take Back Day in many communities nationwide. This initiative aims to provide a safe and responsible means to dispose of medications, while also educating the public about the potential harms of improper disposal. Similarly, communities may sponsor their own medication take back programs. Some pharmacies may also offer on-site medication drop off boxes, mailing programs and other ways to safely aid in disposing of your medicines. Visit the DEA's website ([www.deatakeback.com](http://www.deatakeback.com)) or call (800) 882-9539 for more information.

**Check the FDA's Flush List for Certain Medications:** It is important to understand that some medications may be harmful to others and have specific directions for their disposal. If a take-back program is not readily available, consult the Food and Drug Administration's (FDA) list of medications that are recommended for disposal by flushing. It is also vital to ensure you comply with your community's laws and regulations prior to flushing medications.

**Disposal of Medications in the Household Trash:** If a take-back program is unavailable, most medications can be thrown into your household trash, unless on the FDA flush list.

1. Medications should be removed from the original containers.
2. Remove all personal information, including prescription numbers, on the empty original containers by scratching it off or covering it with a permanent marker.

*continued next page*

<b>DON'T:</b>	Flush unused or expired prescription or over-the-counter medications down the toilet or drain unless the label or patient information has specific instructions to do so.
<b>DO:</b>	Return unused or expired medications to a drug take back program or follow the steps for safe disposal in the household trash.

3. Mix the medications (do not crush tablets or capsules) with undesirable substances such as used coffee grounds, cat litter or dirt.
4. Then, place the mixture into something you may close such as a secure bag or container. This makes the medication less appealing to others and pets, as well as unrecognizable to someone who may go through the trash looking for drugs.
5. The sealed container or bag containing the mixture and the empty containers may now be placed in your household trash.

**Disposal of Inhalers:** Inhaler products may be dangerous if punctured or thrown into an incinerator. It is recommended to read the handling instructions on the labeling of these products. Follow local laws and regulations and contact your trash and recycling facility prior to disposal.

**Disposal of Needles and Syringes:** Proper disposal of needles and syringes is important to avoid accidental needle sticks. It is important to place used needles and syringes into a sharps disposal container that meets the Occupational Safety and Health Administration (OSHA) bloodborne pathogens standard requirements immediately and keep out of reach of children and pets. If a sharps container is not immediately available, you may consider using an alternative container that meets the OSHA requirements:

1. Made of heavy-duty material that is puncture resistant plastic or metal such as an empty plastic laundry detergent that has been emptied and properly cleaned
2. Leakproof on all sides and bottom
3. Opening large enough to accommodate a sharp, but not large enough for a hand to enter
4. Tight fitting and puncture resistant lid
5. Remain upright and stable during handling
6. Clearly labeled or color-coded in accordance with OSHA standards

The days of improperly disposing of medications have expired! By taking proactive steps to safely dispose of your unused or expired medications, we can mitigate risks, preserve natural resources and promote healthier communities. Promoting awareness of take-back programs, in-home disposal methods, and an understanding of proper disposal methods offered can aid in the preservation of both human and environmental health. We prescribe you a dose of safety! ■

# ALM Wishes Chuck Burns a Happy Retirement!

Upon his retirement on March 1, 2024, the League extends its heartfelt gratitude to Chuck Burns for his tireless devotion to its organization and the improvement of Alabama's municipalities. Chuck has touched the lives of many Alabamians across the state through his leadership and devotion to keeping citizens and law enforcement officials safe.

During his tenure as FATS coordinator for the Loss Control Department, Chuck led gun safety courses for municipal law enforcement departments seeking to further train their employees and improve their confidence and decision-making skills in time sensitive situations. By leading the program's courses and taking charge of advocating for the increased training of law enforcement officials, Chuck played an influential role in the improvement of countless police programs across Alabama.

Furthermore, before joining the League, Chuck devoted 28 years of his career to the Alabama Department of Public Safety. Upon leaving the organization in 2004, he held the rank of trooper captain while he served as chief examiner for the driver license division. Chuck also spent several years working with the highway patrol division and in commercial vehicle enforcement with the motor carrier safety unit. ■

# Loss Control Welcomes New Staff Members

## Will Strength, ARM-P, CIC, ARe Loss Control Manager

Will was named the loss control manager for the Loss Control Division of the Alabama Municipal Insurance Corporation and the Municipal Workers Compensation Fund on January 1, 2024. He is responsible for overseeing day-to-day operations for the Loss Control Division. Will has 16 years of experience in the insurance industry.

Prior to being named the loss control manager for AMIC and MWCF, Will held the position of account executive for AMIC, where he provided sales and customer service for accounts in the southern territory. Will first joined the League's Loss Control Division in early 2008 as a loss control representative, where he provided loss control services in the central and western regions of the state for 11 years. In his time with MWCF and AMIC, Will has earned an Associate in Risk Management for Public Entities (ARM-P), Certified Insurance Counselor (CIC), and Associate in Reinsurance (ARe) designations.

Will and his wife, Dawn, are members of Hunter Hills Church of Christ and live in Prattville. They have three precious children: Cody, Abby and Ben.

## Deena Pregno FATS Coordinator

Deena Pregno, FATS coordinator for the Loss Control Department retired from the Alabama Law Enforcement Agency in 2019 with 23 years of service. Upon retirement, she held the rank of ALEA chief over the driver license division. She served several years in the highway patrol, executive security and service divisions. Prior to working with ALEA, she was employed with the Alabama Department of Forensic Sciences for 10 years. Deena graduated from the Alabama State Trooper Academy and received a bachelor's degree in business administration from Troy University. Deena is a member of Frazer Methodist Church.

Madison

**August 21**

Tuscaloosa

## Defining Moment

**Working with your hands can pose risks, such as burns, abrasions, breaks or even amputation. Use this checklist to help keep your hands safe.**

- **WEAR** proper protective gloves when recommended. Make sure gloves are undamaged and fit well. After you remove your gloves, wash your hands if you used chemicals.
- **USE** ergonomic hand tools, if possible. Hold the tools properly, making sure your grip is tight and ergonomically correct.
- **INSPECT** all tools before use. Make sure there are no loose or damaged parts.
- **NEVER** place your hands near or in moving or jammed machine parts.
- **DISCONNECT** power tools after use.
- **DISCONNECT** power and follow lockout/tagout procedures before maintaining or repairing equipment. Never remove machine guards.
- **USE** the right tools for the job. Never use hand tools for other than their intended purpose. For example, do not use a screwdriver as a hammer.

# 2023 Risk Management Awards

In recognition of the efforts and successes of our members, the AMIC and MWCF Board of Directors established the Risk Management Awards system in 2002. Awards are determined based on the loss ratios for each member's prior year. For members of both the AMIC and MWCF programs, the loss ratios are combined and divided by two to reflect the overall loss ratio. Members are eligible to receive the Presidents Award once every five years and the Gold, Silver and Bronze annually. *See Award Designation Key, next page.*
